

Correlation Matrix

$\Delta v/v$ vs. E for $^{252}\text{Cf}(\text{delayed } \nu)$

Ordinate scale is %
relative standard deviation.

Abscissa scales are energy (eV).

$\Delta v/v$ vs. E for $^{252}\text{Cf}(\text{total } \nu)$

Correlation Matrix

Correlation Matrix

$\Delta v/v$ vs. E for $^{252}\text{Cf}(\text{delayed } \nu)$

Ordinate scales are % relative standard deviation and nu-bar.

Abscissa scales are energy (eV).

ν vs. E for $^{252}\text{Cf}(\text{delayed } \nu)$

Correlation Matrix

Ordinate scales are % relative standard deviation and nu-bar.

Abscissa scales are energy (eV).
