

$\Delta v/v$ vs. E for $^{242}\text{Cm}(\text{total } \nu)$

Ordinate scales are % relative standard deviation and nu-bar.

Abscissa scales are energy (eV).

ν vs. E for $^{242}\text{Cm}(\text{total } \nu)$

Correlation Matrix

Ordinate scale is %
relative standard deviation.

Abscissa scales are energy (eV).

Correlation Matrix

Ordinate scale is %
relative standard deviation.

Abscissa scales are energy (eV).

$\Delta v/v$ vs. E for ^{242}Cm (total v)

Correlation Matrix

Ordinate scales are % relative standard deviation and nu-bar.

Abscissa scales are energy (eV).

Correlation Matrix

Ordinate scales are % relative standard deviation and nu-bar.

Abscissa scales are energy (eV).
