Grp-average $\phi(E_{in} = 1.00E+00 \text{ eV})$, $^{239}\text{Pu}(n,f)$

Ordinate scales are % standard deviation and spectrum/eV.
Abscissa scales are energy (eV).

$\Delta\phi/\phi$ vs. $E$ for $^{239}\text{Pu}(n,f)$

Correlation Matrix

Abscissa scales are energy (eV).
